a09c17d780

English

Question 3/150

Lily Black and Lily White
are two different fairies.

And this is ...

Right

Wrong

希腊奶

Okay, I'm a big fan of roguelike games and mechs and this game seemed right down my alley initially. However, there's one thing I detest more than anything else and that is poor game design. You see, this game emulates roguelike experience, like you go there, you fight, you die. Like all roguelike games it gives you the rush, you want to get better to beat it. But the problem is that there's no point of getting better, as there's a reliable sequence of steps that will bring you to victory. To achieve this you have to avoid the missions that will get you killed that were put there by the developers to emulate the roguelike experience. When there's no point of getting better at the game, and half the missions being deathtraps you realize that you've been fooled and there's nothing more to this game than visual aesthetics.. A great, challenging, rhythm platformer! A must-buy for people who love a challenge and great music.

For me, it was quite difficult initially, until I realized to rely less on sight and more on sound. Which is very appropriate as the music was composed by veteran EDM artist, bLiNd

Have yet to finish the game, but there is great replayability in trying to get the best scores.

Great feeling of accomplishment when you finally manage to hit all the beats.. great party game, we played with Vive and several 360 controllers. Wish there were more games like this!. One of my fav. game now!

This game might be complex, and hard to make profit at first, but this "complex" is the reason why the game is fun.

I played train fever, cities in motion 2, but none of the game reaches this realistic simulation. This game allows players to not only lay tracks and build stations, but set timetable for each trains. I might adjust the timetable so there will be less train at night and more trains at rush hour, or make express trains stopping at only the big station, or even a limited express train connecting the rural area, and the central city.

It is worth every cent.

10V10, Best Game. I played this on the Oculus Rift with Touch Controllers. I didn't notice any issues (I only used 2 sensors with standing room only setup). Obviously, this game is better with 3 sensor setup and full roomscale and I will try that at a later time. You move by holding the triggers and moving your hands like a running motion. And you climb by holding the grip buttons. There are leaderboards for bragging rights.

The gameplay is basically climbing medieval castle towers. The game is very particular about which paths are open or not to climb up, and you can tell with the buzzing of your motion controllers when you are not in a good situation. However, several times I saw paths that should be good and visually looked like they could be used when they were not. In particular I found a spot where the game would take me temporarily to a menu loading screen and then I would fall all the way down. This happened each time I tried going up this way and eventually I had to find an alternative path. Also, not sure if this was a bug or not, but it seemed I fell a few times from a ledge randomly (I was holding on to the grip button).

There is an interesting co-op mode gameplay where one person climbs and tries to avoid guards, while the other person shoots bows and arrows to distract them or to create new paths to climb. I didn't get to try that, but it seems like something innovative which may be fun to play.

Given the price, I do recommend this game.

Rate: 6V10

I would rate higher if they added more challenging elements to the climbing or traps to avoid. Also, I hope they would have different objects to climb instead of just castle towers, like a church. I'd be happy with a modern city building.. This game was exactly what I was craving. A basic dungeon crawl with some puzzles and enough story to keep you going. Don't look at this as a big time AAA production, but for what it is, it's well done. I'm an old school gamer so graphics don't matter that much. They aren't bad but nothing that hasn't been done better by older titles. The ambient effects and monster sounds are quite good and add suspense to the exploration. The game length was a tad short, but that's OK as so many RPG'S try to out-epic each other, and Ruzar doesn't feel the need to do that. I'm looking forward to a sequel, and seeing what the developer adds to an already solid platform.. controls were awkward and levels felt very similar and boring. Only thing they could have done to make this better is put it with foot blood knights.

FLC - Thumbs up.. Personally one of the greatest games I have ever played. It may be hard to get into at first but if you watch a

few guides by Muselk, you will be playing competitively as if there was no tomorrow

This is hands down the best multiplayer game you can play on VR. There are no "Experts" here. There is no issue of people who have insanely fast reflexes. Why? Your body is the controller. You can grip the gun with one or two hands. You actually hold the gun up to your face to snipe. You lean down to crouch. All VR headsets have microphones built in, so everyone has voice chat by default. This is the golden age of PC multiplayer gaming brought back to life. Here are a few of my favorite stories so far.

#1 accidentally dropped my grenade right after pulling the pin. Guy next to me screams, I shout alahuakbar and we both die.

#2 Accidentally drop my gun because someone ran around a corner and startled me. I attempted to punch them to-death (you can't do that) and he laughed so hard that he dropped HIS gun. Which I picked up and killed him with.

#3 I discovered that making funny noises at people through the microphone right as they come around a corner will sometimes startle them enough to make them drop their gun so I can kill them.

#4 when you crouch in real life you crouch in the game. So I kept crouching around corners with a knife frantically trying to slice up people with guns.

Buy this. Have fun. Its amazing.

. Nice game. Epic soundtrack and great magical effect. Puzzle fun guaranteed.. Buggy, un-polished but fun.

Very much an Advance Wars clone without any form of story, no commanding units and nearly zero polishing. Despite this it is an Advance Wars clone so it a lot of fun! There is literally no story what so ever and often the menus are clunky/ glitchy (between each map it takes you back to the main menu and you have to click campaign again). The lack of commanders means no banter and less tactical nuance but overall I had fun and it is dirt cheap when on sale.. Utter trash and a waste of time and money. You would be better served paying someone to kick you in the nether regions than buying this game.. Very short but a good bit of fun while waiting for the Last Crown Blackenrock. I really enjoyed the Lost Crown, loved the characters, puzzles and atmosphere so it was great to return to Saxton for more.

I really enjoyed this but expected it to be a little bit longer for \$5. The game doesn't give you enough money to start out on.. This game won't change your \u2665\u2665\u2665\u2665in life or anything but it's very unique and worth the brief play through I mean\u2665\u2665\u2665\u2665it's 5 bucks stop being a Jew and just check it out.. With this and soundtrack set to random makes every level even more unique. Love A_Rival remixes! **Highly recommended** :)
